tel: 827-5575

Gypsies are historically and presently one of the most reviled groups in the world. Why is this so? In this seminar we will explore Roma/Gypsy migrations and cultural formations in the face of discrimination and genocide, while passing through many cultures and periods of history from the 13th century to the present. In particular we will explore the current global conditions and problems to which they are adapting and the critical human rights violations they experience.

Some of the books we will read:

Hancock, Ian 2002. Who are the Romani People. Hertfordshire Press.

Sutherland, Anne, 1986. Gypsies: The Hidden Americans. Waveland Press.

Vishnevsky, Victor 2006. Memories of a Gypsy. Salo Press.
